Guaranteed Admission Agreement Between
Virginia Polytechnic Institute and State University's
College of Engineering
and the
Virginia Community College System

Virginia Polytechnic Institute and State University (Virginia Tech) and the Virginia Community College System (VCCS), recognizing the need to facilitate the transfer of students from the community college to Virginia Tech College of Engineering, resolve to adopt the following Guaranteed Admission Agreement (GAA).

SECTION 1: General Requirements and Application of Credit

In order to meet the requirements of this agreement and be guaranteed admission for a Summer or Fall term, a student must have:

- Completed a transferable engineering or science Associate Degree¹ in May of the year they plan on beginning at Virginia Tech
  - Applicants not completing associates degree until summer may not be guaranteed a spot in the fall class of the same year; such students are guaranteed admission, but may be deferred admission to a later term, dependent on course availability per program

- Achieved a cumulative grade point average of not less than 3.2 (in a 4.0 system) on Associates Degree, as determined by the Virginia Tech Undergraduate Admissions Office.²

Students who were previously enrolled at Virginia Tech and transferred back to a VCCS site to complete the transfer degree do not need to reapply for admission. Such students should contact Christi Boone (chboone2@vt.edu) to discuss future enrollment at Virginia Tech.

Associate Degree holders accepted for transfer under this agreement will not be subject to special requirements beyond those specified as major department, general education, and/or graduation requirements for students who originally enrolled in Virginia Tech as freshmen. Virginia Tech will consider students admitted under this guaranteed admission agreement on the same basis as native students (students who began as freshmen at Virginia Tech) for admission to competitive programs, registration, financial aid, scholarship, student housing (on a space available basis), parking, and any other opportunities open to native students with junior standing.

Virginia Tech waives its application fee for students with demonstrated financial need, specifically students who are eligible for Pell Grants. An interested student should contact the Virginia Tech Office of Undergraduate Admissions by the application deadline to discuss.

Virginia Community College students who have completed an Associate Degree and have a cumulative GPA of 3.2 at the time of Associates degree completion are guaranteed admission to General Engineering at Virginia Tech. Admission to a specific department is subject to space availability and specific

¹ Degree must be transferrable, not an Associate of Applied Science.
² All course grades on the VCCS transcript, including repeated classes, are included in the calculation of the overall GPA prior to degree being conferred.
departmental entrance requirements. Eligible students will be admitted to alternate engineering majors if
the first choice of major is not available.

Graduation credit hour requirements for the various departments in the College of Engineering range from
123 to 135. The College of Engineering will transfer from the community college up to one-half of the
credit hours required for graduation. The College of Engineering may require more than two years of
course work for the Baccalaureate Degree and will specify major course requirements.

Completion of an Associates Degree in Engineering or Science will guarantee completion of the Virginia
Tech Liberal Education (general education) component of the undergraduate curriculum.
Advanced Placement, International Baccalaureate, CLEP, and any other advanced standing credits
will be re-evaluated by Virginia Tech upon enrollment. Virginia Tech will not award any credit for
experiential learning.

Students without the Associate Degree or with credits or grade point average lower than that specified
above may be considered for transfer admission on an individual, competitive basis; however, admission
and application of credit will not be guaranteed under the terms of this agreement.

Students earning an Associate Degree concurrent with high school graduation (sometimes referenced as
dual enrollment or Early College) are not eligible for admission under the terms of this agreement. These
students are considered freshmen with transfer credit, not transfer students. Such students must apply as
freshmen and should complete a Virginia Tech Freshman Application and will be reviewed for admission
using the holistic criteria for all freshman applicants.

Virginia Tech reserves the right to deny admission to students who have been academically dismissed or
suspended, or to those convicted of a felony. Per university policy, all applicants and currently enrolled
students must report arrest, conviction, and protective orders. Disciplinary records are considered in
determining eligibility for admission.

VCCS transfer students applying to the College of Engineering may be eligible for Lifeline Scholarships
or Two-Year College Transfer Grants, administered by Virginia Tech’s Office of Scholarships and
Financial Aid. More information is available at
http://finaid.vt.edu/undergraduate/typesofaid/scholarships/academic-scholarships/vt-vccs-lifeline-
scholarship.html and http://finaid.vt.edu/undergraduate/typesofaid/grants/two-year-college-transfer-
grant.html.

The College of Engineering also has a scholarship available to any VCCS graduate with a transferable
Associate Degree. The Leo Padis scholarship is awarded by the College of Engineering to students in
their first year of study at Virginia Tech; the scholarship award is $1000 ($500/semester), and is awarded
at the beginning of a fall semester only. This scholarship process requires an application, to be submitted
to Virginia Tech no later than June 1 prior to the summer II or fall term of admission. Scholarship
applications are available online at https://www.eng.vt.edu/undergraduate-
admissions/scholarships_incoming by April 1.
SECTION 2: Course Transferability

Credits accepted by the College of Engineering may or may not satisfy the requirements of the degree program into which the student transfers. Subsequent graduation from the College of Engineering, therefore, is not assured within a two-year period of full-time study.

Remedial, developmental, and/or vocational courses will not be counted for academic credit in transfer. All transferable engineering courses must have the VCCS course prefix EGR.

All courses completed at the community college and offered for transfer credit to the university must be passed with a grade of C or better.

SECTION 3: Publication of Requirements

All requirements for admission to the university should be set forth with precision and clarity. The University catalog will include a description of this articulation agreement in both the Engineering and Admissions sections.

Checksheets, with graduation requirements for each engineering major, will be available through the University Registrar’s office (at http://registrar.vt.edu/graduation-multi-brief/index1.html).

SECTION 4: Terms of Articulation Agreement

The terms of this articulation agreement shall be effective with the academic year beginning August 2017 and apply only to the College of Engineering. It shall be reviewed every three years at the Virginia Tech Engineering Articulation Conference.

Virginia Tech will provide tracking data annually on the performance of students enrolling in the College of Engineering under this agreement, to include comparison with native-to-Virginia Tech students. The specific data elements and the timing of the report will be determined by the institutional research staffs at VCCS and Virginia Tech. Students who began VCCS enrollment prior to fall 2017 will be expected to meet requirements of either this agreement, or the prior agreement for guaranteed admission through July 2017.

SECTION 5: Agreement Withdrawal

Either party to this agreement (the Virginia Community College System and Virginia Polytechnic Institute and State University's College of Engineering) may withdraw from this agreement by providing written notice to the appropriate parties. The following must be notified two years in advance of their intention to withdraw: Virginia Polytechnic Institute and State University Provost, Dean of the College of Engineering, and the Vice Chancellor of Academic Services & Research of the Virginia Community College System.
Signed:

Timothy Sands  
President, Virginia Tech  
6/15/18  

Glenn DuBois  
Chancellor  
Virginia Community College System  
5/2/18  

Virginia Tech reviewers:

Cyril Clarke  
Interim Executive Vice President and Provost  
2-2-18  

Bevlee A. Watford  
Associate Dean for Academic Affairs  
1/22/18  

Julia M. Ross  
Dean, College of Engineering  
1/22/18  

Luisa M. Haynes Gerardo  
Vice Provost for Enrollment & Degree Management  
1/22/18
