Symptoms of COVID-19 infection usually begin 2 to 14 days after exposure.

Common symptoms may include:
- Fever
- Dry cough
- Shortness of breath or difficulty breathing

Less common symptoms may include:
- New onset diarrhea and/or vomiting
- Loss of ability to smell
- Loss of ability to taste

If you’re experiencing these symptoms, call your doctor or a local virus hotline BEFORE you go to a medical facility. If your symptoms are severe, visit an ER or call 9-1-1.

With these symptoms, seek immediate medical care:
- Persistent chest pain or pressure
- Bluish lips or face
- Difficulty waking up or slow to respond
